

Case Study

OVERVIEW

CCS Homes are located on the Fraser Coast in Queensland. They have been building custom homes in the area for over 20 years.

CHALLENGES

Darren Cook, the Managing Director of CCS Homes wished to move away from polystyrene void formers to an environmentally sustainable product that was cost efficient to install.

TESTIMONIALS

“I like the NuPod system because I believe that recycled plastic is the future and we have to get rid of waffle pods due to the mess on site.”

Darren Cook, Managing Director - CCS Homes

SOLUTIONS

NuPod's Sales Manager, Justin Gatto worked closely with, CCS Homes Engineer to ensure that the slabs were designed to successfully incorporate NuPod with the most economical concrete usage.

OUTCOME / RESULTS

Achieved improved efficiencies and cost savings

- The NuPod and the steel were delivered on the one truck
- Faster installation
- No offcuts to be collected
- More accurate cost calculations
